visplore

Visplore is a highly interactive software solution for visual data analytics in industry. Our mission is to help Industry 4.0 master the digital transformation. Our self-service analytics software empowers engineers and data scientists in turning data from industrial processes into business value and data-backed decisions within minutes. Visplore customers worldwide have gained key insights how to reduce energy consumption, downtimes, waste, and hours of experts spent on data preparation and routine reporting.

You'll work in an inspiring startup atmosphere: 22 talents located in central Vienna, backed by multiple European VC investors, and growing fast. We are currently extending our team with a

C++ Developer (m/f/d) in High-Tech Start-Up

As part of our team, you will work on automatization features and advanced algorithms on time series.

What you will do
- Implementing automatization features, working on advanced algorithms for time series data and integrations with time series data base systems.
- Evaluate requirements and specifications, perform effort estimations, and write test cases for tasks and projects.
- Participate in agile development practices, including stand-ups, sprint plannings and demo/retro sessions.

Who you are
- You have previous experience in writing performant, modern C++ code, while keeping in mind Object-Oriented Design (OOD).
- You are a quick learner when it comes to understanding underlying business problems and customer requirements.
- You are independent, diligent, pragmatic, and reliable in your day-to-day work.
- You value teamwork and don't hesitate to help your teammates, occasionally pair-programming to solve blockers.
- You have good oral and written English communication skills.
- You are willing to relocate to Vienna -- one of the most livable cities in the world!

Appreciated additional skills
- Degree in Computer Science, or a similar field
- Experience with time series database systems and writing algorithms on time series data
- Experience with Python
- You speak some German - however, this is not a requirement 😊

Why you will love working at Visplore
- Inspiring start-up atmosphere with helpful and friendly colleagues
- Work on a game-like software based on award-winning research results.
- Central, easy to reach working location in central Vienna (near Westbanhof)
- Part-time home office possible, flexible working hours
- High-performance hardware for your work

- All of the perks of working in a start-up -- monthly company events and team activities, games, table soccer, branded hoodies…

This is a full-time position (38.5h/week, 5 weeks PTO) with a minimum salary 3.500€ gross/month (14x per year). Higher salary is possible based on qualifications.
