

Visplöre (www.visplöre.com) is a software start-up in interactive visual data science. Our mission is to make exploring big sensor data a joyful experience that is accessible for everyone. We are located in Vienna and have numerous national and international customers in manufacturing, energy, and R&D. After having recently closed a VC financing round, our next step is to start worldwide distribution of our software with a Freemium model. For this, we would like you to join our team as a

C++ Developer (m/f/d) in High-Tech Start-Up

As part of our cheerful and supportive team, you will improve Visplöre to the benefit of users worldwide. And hopefully you will be infected by our enthusiasm... :-)

Your focus

- Extending data connectivity to state-of-the-art IoT databases and data science tools
- Work on cool interactive graphical features
- Supporting multi-platform portability
- Supporting test automatization

Our offer

- Inspiring start-up atmosphere with helpful and friendly colleagues
- Work on innovative, game-like software based on award-winning research results
- Improve your skills in high-performance C++, data visualization, data science, ...
- Work location in central Vienna, partly home office possible
- Agile development using Gitlab and Visual Studio
- High-performance hardware
- Flexible working hours
- Minimum salary 3.000€ gross/month (14x per year), overpayment based on qualification

Your background

- In-depth experience in C++
- Good software engineering know-how
- Degree in computer science or similar is a big advantage
- Diligent and reliable way of working
- Teamwork and creativity
- Good oral and written English communication skills

Appreciated additional skills

- Python
- Asynchronous programming
- Experience with development under Linux
- Experience in software-testing
